

1LR

We have been looking at Superheroes and People who help us. There are some activities you could continue at home.

- Looking at and identifying the different heroes and what makes them special
- Looking at different people who help us – teachers, doctors, vets, nurses, crossing supervisors, firemen/women, librarians, taxi and bus drivers etc
- Playing with toys from the above topics – can you child identify, their colours, jobs, characteristics, gender, clothing etc?
- Can you child write words/over copy key words or sentences regarding these topics?

Literacy

We have been looking at phonics and letter formation.

- Can your pupil identify each letter sound?
- Can they order the alphabet?
- Can they tell you words for each letter?
- If they can write words could they develop a key word such as butter into a sentence?

Numeracy

- Look at numbers to 100 – can they identify/order these numbers.
- Can they count out a given number of objects? Can I have 6 please ? etc
- Can they develop these known numbers into addition or subtraction?
- Look at 2D and 3D shapes, identifying them and telling you their sides, corners etc.

As well as these academic topics you could think about some more outdoor/practical ideas.

- Art – paints, colouring, drawing, copying pictures.
- Modelling using junk items and recycling such as cardboard boxes, tubes, egg boxes etc.
- Can they help with snacks, breakfast and making meals – chopping, spreading, mixing etc.
- Collect items from outside – can you find 6 sticks? Which one is biggest? Use leaves for collage?

Twinkl has lots of suitable activities and PowerPoints to support all of the above. YouTube is a fantastic source of educational videos aimed at a broad range of abilities.

Please feel free to contact me via email. I am available for any ideas or advice you may need.
