

Where are the world's hot and cold places?

## Where are the world's hot and cold places?

1. Label these 3 features on your map: **Equator, North Pole and South Pole.**

### Cold Places

2. Colour all of the land and sea south of the Antarctic Circle **blue**, to show that this is a region where cold places are found.
3. Colour everywhere north of the Arctic Circle **blue** too.
4. Write the name and draw a picture of an animal you'd see in:
  - a. the Arctic: \_\_\_\_\_
  - b. the Antarctic: \_\_\_\_\_

### Hot Places

5. Colour the belt of land and sea between the Tropic of Cancer and the Tropic of Capricorn in **orange** or **red**. This is the region where the world's hot places are found.
6. Write the name and draw a picture of an animal you'd see in:
  - a. a tropical rainforest: \_\_\_\_\_
  - b. a hot desert: \_\_\_\_\_

# Describing the rainforest

Recognise the features of a hot and cold place.
