

The Sixth form Tees valley group are doing some great work experience in the Forest school area. They have identified a section of the garden to make an outdoor reading / learning area.

The students have been learning how to use tools and equipment correctly and safely. They are gaining great construction skills. chopping down trees, trimming the shrubs and clearing the ground, building self-esteem and great team work.

They have used the tree stumps to mark out the area to be worked on. Nigel has sauced some materials to make the inner shell of the reading area, and the students will use the shrubs to make an outer shell. When it is completed the learning hub will be a great asset for all the school to use for their outdoor learning.
