

Beverley Sixth Form – KS5

Rationale

Beverley's KS5 sixth form encompasses years 12-14 and many students will choose to stay and study for the full three years. Where appropriate, students may choose to move on at the end of Yr.12 or 13 to a more specialist FE destination. Our focus is on preparation for adulthood through a life skills and vocational curriculum supporting independence and personal development whilst continuing to build on skills in English and maths especially in functional community and employability contexts. The curriculum intends to provide our students with a varied and balanced range of contextual opportunities for learning with personalisation to address and meet individual needs and interests. This is supported effectively by a team of specialist staff and a well-resourced provision to facilitate a high-quality delivery for our students.

Our Vision

For each of our students with Autism and additional needs to become as independent as possible, having a valued contribution to society in the pursuit of a happy and fulfilled future. To make choices, develop relationships and participate confidently in society and the working world.

Our Aim

To embrace and develop meaningful opportunities to learn and make progress through a real world contextual and functional curriculum that best prepares them for their future.

Our Principles

Preparation for adulthood based on individual interests, aspirations and the pursuit of an independent and fulfilling life.

- High aspirations for personal development, independence and achievement
- Key functional skills / vocational options and opportunities
- Individual pathways, flexibility access and choice for all learners
